SUMMARY

I am a University of Maryland Information Science student with a minor in Cybersecurity, graduating May 2027. I build AI products and then work out how to position and sell them: a local AI video studio whose agents post for brands I run, a desktop AI coding agent, a self-funded data-protection SaaS, and Tessaly, my web design studio with its first contracted client.

EDUCATION

University of Maryland, College Park, Bachelor of Science in Information Science; Minor in Cybersecurity Aug 2023 to May 2027 (expected)

- **Coursework:** Object-Oriented Programming (Java, Python); Database Design (SQL); Statistics & Data Analysis (R); Calculus I & II; Linear Algebra; Intro to Cybersecurity (CodePath.org)
- **Activities:** Cybersecurity Club; The Computer Society; College Success Scholars

EXPERIENCE

Founder, Tessaly, Remote, US Sep 2026 to Present

- Run a web design studio that builds custom websites for businesses of every size, with packaged tiers from \$15K and a monthly care plan
- Contracted by the San Francisco Black Economic Chamber of Commerce (SFBECC) to redesign and launch its website; its new landing page has been live at sfbecc.org since September 2026
- Prospect private practices and professional firms by cold call, opening with a free website audit

AI Specialist Intern, IT Automation & Systems Admin, CORE Maryland, Rockville, MD Jun 2026 to Sep 2026

- Built a help desk ticketing portal with Power Apps and SharePoint to centralize internal IT support requests
- Designed a Power Automate approval workflow for distribution list changes, routing each request to the list owner or IT
- Supported Microsoft 365 administration across Entra ID, SharePoint, and Azure Automation runbooks
- Prototyped LLM-driven browser automation of Power Apps authoring with a local model (Qwen) and MCP

Business Development, GuardMyData, Remote, US Jun 2024 to Present

- Built a self-funded data-protection SaaS from concept to payment flow, owning pricing, positioning and the customer journey end to end
- Reached the first \$200 MRR with no ad spend through organic outreach, a free data-risk checker as the lead magnet and a 14-day free trial with no card required

Outbound Sales Apprentice, SWORD SaaS Coaching, Remote, US Jan 2026 to Present

- Selected into SWORD SDR School with a 3% acceptance rate, with 1:1 coaching from SDR leaders

Intern, Cybersecurity & Information Systems, National Institute of Standards and Technology (NIST), Gaithersburg, MD Nov 2021 to May 2023

- Wrote and tested software components to support internal research applications
- Managed data using SQL databases for organizing, querying, and reporting results

PROJECTS

ContentFarm, TypeScript, Node.js (Fastify), SQLite, React, Tauri, Python github.com/Jviat0r/contentfarm-showcase

- Built AI agents that research topics, write, render, review and post short videos to Instagram, TikTok and YouTube for brands I run, through browser sessions I log in to myself
- Ran 278 topics through the pipeline in its first 9 days, rendering 940 videos and checking 573 of them with a local vision model before any were queued

Rosalena Harness, Node.js, Electron, Cloudflare Pages and D1, GitHub Actions rosalena.pages.dev

- Built and shipped a desktop AI coding agent for Windows and macOS that runs local and free cloud models through one router, falling back to the next model when one is busy or rate limited
- Wrote 890+ automated engine tests and 160+ site tests, with a GitHub Actions pipeline that builds, checksums and publishes every release

Controller Hub, Rust, Tauri, JavaScript github.com/Jviat0r/controller-hub

- Built a Windows app that reads PlayStation controllers over raw HID and re-emits them as virtual Xbox controllers through the ViGEMBus driver

SKILLS

Skills: AI Agents and MCP, TypeScript, JavaScript, Python, Rust, SQL, React, Node.js, Automated Testing, Cybersecurity, Identity and Access (Entra ID), Workflow Automation, Positioning and Messaging, Pricing, Cold Outbound (calls, email, LinkedIn)

Tools: Git, GitHub Actions, Electron, Tauri, Vite, Vitest, Cloudflare Pages and D1, SQLite, Power Apps, Power Automate, SharePoint, Azure, Apollo, HubSpot, Figma
